Science Sleuths - A SCI-FI Science Adventure- Grades K to 4

Professor Evan and the Forbidden City!

Episode 2

Using the Circle Cypher you read the message:

IN THE EVENT OF MY DISAPPEARANCE

Hello friends,

*If you are reading this, I have gone on ahead. I am searching for the lost city of **Atlantis**, I have found what may be its location, but I need to check. The only way into the city to unlock their knowledge is to build a **key**. The **key** though is broken and scattered throughout time. You must find the parts of the **key** and reassemble it and meet me at **Atlantis**' gates. Use the **time machine** that I have hidden in the top shelf of **my closet**. I will see you there.*

Prof. E

Time Machine!!!! Whaaaaat?!!!!

You whirl around, your eyes are darting around the room.

Throwing open the door to the closet, you lookup and see a strange box on the top shelf. It's heavy. You slowly lower it onto the desk. It has an old-fashioned keyboard on it. Stuck to the top is a yellow sticky note: You lean in for a closer look…..

(Sticky Note Attached to the Time Machine – Using the Same Cypher as Before)
